

Sample Student

B.Tech Computer Science (Final Year) | Aspiring Data Analyst

Summary

Final-year student with hands-on experience in data analysis and machine learning. Comfortable cleaning data, building dashboards and training simple models.

Skills

Programming: Python, SQL, Java

Data: Pandas, NumPy, Excel, Power BI, Matplotlib, Data Visualization, Statistics

Machine Learning: Machine Learning, Scikit-learn, Feature Engineering

Databases: MySQL, SQLite

Tools: Git, GitHub, Jupyter, Streamlit

Projects

Sales Dashboard - Built an interactive dashboard using Power BI and Excel to track monthly sales and top products. Cleaned the data with Pandas and wrote SQL queries in MySQL.

House Price Prediction - Trained a regression model using Python and Scikit-learn. Applied feature engineering and compared models using Matplotlib charts.

Student Result Analyzer - Created a small Streamlit app to upload a CSV file and show statistics and charts.

Education

B.Tech in Computer Science and Engineering, Sample University (expected 2027)

Experience

Data Analytics Intern (2 months) - Analysed customer data using Excel and SQL and presented findings to the team.
