

Sample Student B

B.Tech Computer Science | Aspiring Machine Learning Engineer

Summary

Student focused on building and deploying machine learning models.

Skills

Programming: Python, SQL

Machine Learning: Machine Learning, Scikit-learn, Feature Engineering, MLflow

Backend and Tools: FastAPI, Docker, Git, GitHub, Linux

Cloud: AWS

Projects

Churn Prediction - Trained models with Scikit-learn and tracked experiments with MLflow.

Model API - Served a trained model through a FastAPI REST API packaged with Docker and deployed on AWS.

Education

B.Tech in Computer Science, Sample University (expected 2027)
